## corner guide post

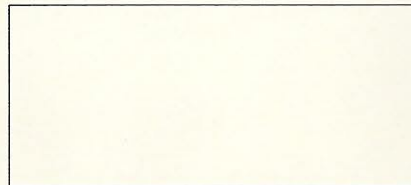

The corner guide post is an aid to identifying where the corner of the pontoon is, always a problem when reversing or leaving a mooring, particularly with sports bridge boats. A must for single helming.

D-FENDA is a unique range of Fenders designed specifically for fixing to your pontoon. The fenders are made from a hard wearing, and versatile polyurethane which offers excellent impact resilience and has been proved in many offshore and marine applications.

D-FENDA is the only range of polyurethane fenders specifically designed for fixing to the pontoon, reducing the necessity for depolying standard boat fenders for mooring. Also offering excellent protection, when entering and leaving the mooring.
